

# How do i add the google font in the theme?

Search your font at <https://fonts.google.com/>

In our example we will use the <https://fonts.google.com/specimen/Open+Sans>

Add the variants of your choice to the selection

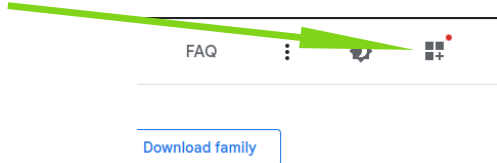

e gro Light 300

gro Light 300 Italic

he g Regular 400

rr Regular 400 Italic

After that click on the icon to view the selected fonts

Copy the part inside the link area

This is what you have to put into the field in the theme google font textarea

Set your font in the typography area under General

To embed a font, copy the code into the <head> of your html

<link>  @import

```
<link rel="preconnect" href="https://  
fonts.googleapis.com">  
<link rel="preconnect" href="https://  
fonts.gstatic.com" crossorigin>  
<link href="https://fonts.googleapis.  
com/css2?family=Open+Sans&display=swa  
p" rel="stylesheet">
```

Save the theme and you should now have the font you need.

Please be aware, that these fonts are loaded from the google server and that you have to inform your customers about that in the legal area of your web presence according to the data safety regulations of your country.
