## Basic Settings

### Basic Settings

---

 This configuration holds fields that can be used in a theme. Please compile the theme for these changes to be visible.

Minimum age

21

Cookie Lifetime

1 Day

**Minimum age:** Set your desired minimum age for using your shop here.

**Cookie Lifetime:** Once your customer confirms they meet the minimum age requirement, a cookie is set to ensure that the prompt does not appear immediately again. Under this point, you can set the cookie's lifespan, i.e., the time until the prompt should reappear.

## Mark a product as age-restricted

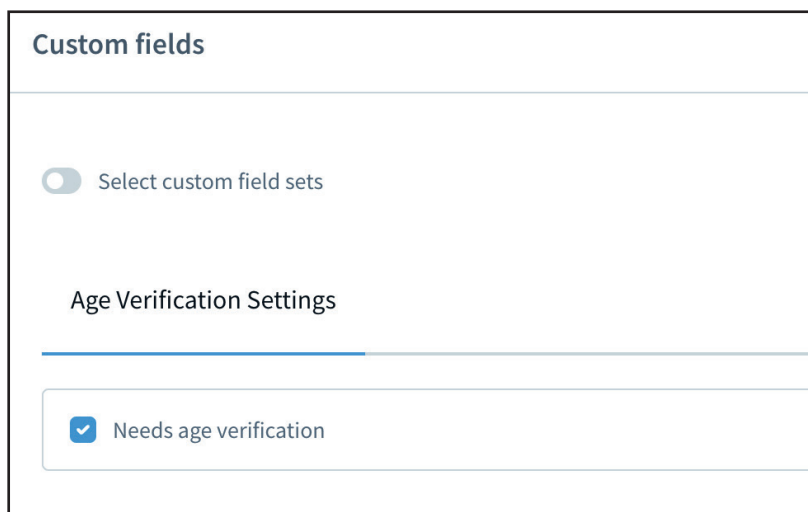

Go to **Catalog** -> **Products** and open the desired item there.

In the opened product, go to the **Specifications** at the top.

Now scroll down a bit to the **Custom fields**. There you will find the **Age Verification Settings** and a checkbox „**Needs age verification**“. Check this box to assign an age restriction to the product.

## Modal Settings

### Modal Settings

 This configuration holds fields that can be used in a theme. Please compile the theme for these changes to be visible.

☒ Show modal image 

Choose an image to show in the modal window.

Modal Image Max Width (px) 

160

Choose Info Landingpage 

Choose your info landingpage 

Choose shopping experiences, on which the modal should not be opened

Choose one or more shopping 

☐ Info Button active

**Show modal image:** If active, an image will be shown inside the modal window.

**Choose an image..:** Choose your desired modal image here. If no image has been uploaded and the modal image is active, your shop logo will be displayed.

**Modal image Max Width (px):** Set your desired maximum width of the modal image in pixels here.

**Please compile your theme to make changes visible.**

**Choose Info Landingpage:** Here you can specify a landing page that the customer is directed to as soon as they click on „Decline“ or the Info button in the modal query. If no landing page has been specified, a link to the Federal Ministry for Family, Seniors, Women and Youth is set as the default.

**Choose shopping experiences...:** Here you can select one or more shopping experiences where the modal query should not be opened.

**Info Button active:** If active, an additional third info button is displayed, which can be linked to a landing page.
